

Rebuild Enclosed Block Seals Quickly and Easily

1-866-476-0367

Extend the Life of Your Enclosed Block Seals, Even Longer.

Nothing lasts forever, but the Enclosed Block Seals (EBS) on WILO EMU Pumps are extremely long lasting. The silicon carbide surfaces are designed to last 15 to 20 times longer than ordinary carbon-ceramic seals (and 2-1/2 to 3 times longer than tungsten carbide materials).

During this long life, it may become necessary to replace o-rings, springs and pins, so WILO EMU has developed a convenient seal rebuild kit for this purpose. In addition, WILO EMU has designed a simple tool to facilitate the easy removal of an Enclosed Block Seal and a tool especially for the convenient replacement of an Enclosed Block Seal. Equipped with these two tools and the EBS rebuild kit, you will find the process to be both efficient and effective.

Call today, so that you will have the kit and tools on-hand when it's time to rebuild.

Rebuild Kit Includes

- > Silicon Carbide Upper and Lower Faces
- > Silicon Carbide Center-Rotating Face
- > O-Rings Viton
- > Viton Center Sleeve
- > Springs
- > Locking Pins
- > Alignment Pins

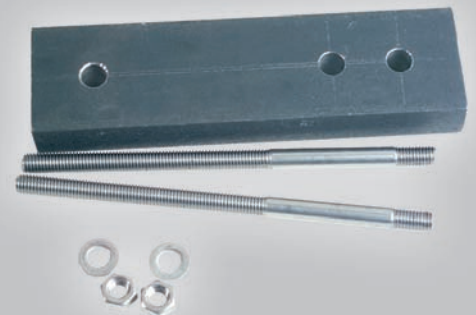

Part No. 6017667 H35mm
